LICKETY-SPLIT LADDERS

ReadyLadder solutions give you a leg up for solving safety and access needs in a hurry. For every fixed-ladder application from high roof access to short climbs, just bolt together prefabricated ReadyLadder lengths from Bedford to meet your exact needs without waiting for a custom build. It's that easy.

Applications

- Cooling towers
- Mining
- Oil & gas
- Plant & chemical processing
- Pulp & paper
- Utilities
- Wastewater & water treatment
- Much more

THE QUALITY YOU NEED

Step up to ladders that hold up against harsh environments and working conditions. Pre-engineered ReadyLadder components are made of fiberglass-reinforced polymer (FRP), the same proven, long-lasting, OSHA-compliant material that has made Bedford custom systems so popular. You'll get the configuration flexibility you want without any sacrifice in strength and durability.

- Resistant to heat, high winds, rain, snow, saltwater and chemicals
- Won't shrink, swell, warp, corrode, attract insects or conduct electricity
- Lightweight for easy transport and handling
- Easy to assemble with standard tools
- Meets the demands of load-carrying conditions
- Low maintenance for decades of continuous use
- OSHA compliant
- Industry-leading warranty

Ready to Ship

There's no need to wait for custom fabrication. ReadyLadder solutions are stocked in standard lengths for quick shipping, so you can start installing your ladder system in just a short time. You can add a walk-through for a complete system as well as combine ReadyLadder components with other ReadySeries materials for limitless configurations.

Easy to Assemble

If you think you'll need a welder or special tools, think again. ReadyLadder components simply bolt together for easy onsite installation. The lightweight design makes it a breeze to move them around. In most cases, our standard sizes will give you exactly what you want, but if needed you can also easily trim components to fit using standard tools.

CUSTOM-ENGINEERED SOLUTIONS AVAILABLE

Get exactly what you need — *fast!*

Step Up to Safety

Non-slip rung surfaces. Safety yellow. Flame-retardant resins. UV inhibitors. With ReadyLadder materials, you won't have to worry about meeting strict OSHA guidelines for worker safety. And unlike metal ladders, they're non-conductive for added safety. Add in FRP's durability in severe weather and corrosive environments, and you can count on meeting safety needs for years to come.

IN STOCK AND READY

ReadyLadder materials come in 10' and 15' increments for quick shipping and assembly. If needed, you can also easily trim components to fit.

Optional ReadyLadder walk-through extensions attach to the top of the ladder to provide a safe, easy transition to the next surface. The OSHA-compliant extended sides give workers a handhold as they step off the ladder.
