STAIRS IN A SNAP

Photo of assembled stair tower prepared for shipment.

Don't wait for a custom build when you don't need one. Take your safety and productivity needs to the highest level with ReadyStair stair towers from Bedford. ReadyStair sections are also used in conjunction with ReadyPlatform materials to meet any configuration need.

Applications

- Power generation
- Oil & gas
- Water & wastewater
- Cooling towers
- Industrial plants & facilities
- Food & beverage facilities
- Fertilizer & chemical operations
- Distribution & warehousing
- Much more

YEARS OF RELIABLE SERVICE

Made of fiberglass-reinforced polymer (FRP), ReadyStair modular solutions hold up well under the harsh conditions that cause metal and wood structures to fail. You'll get the quick installation you need and long-lasting performance you want.

- Resistant to heat, high winds, rain, snow, saltwater and chemicals
- Won't shrink, swell, warp, corrode, dent, attract insects or conduct electricity
- Lightweight for easy transport and handling
- Easy to assemble with standard tools
- Meets the demands of load-carrying conditions
- Low maintenance for decades of continuous use
- OSHA compliant
- Industry-leading warranty

Ready for Quick Shipping

Bedford keeps ReadyStair materials handy for quick shipping to your installation site. Stair towers fit in a 7' 6" x 12' nominal footprint, rising in 6' increments between landings. When needed, a short stretch of up or down stairs is provided for the final transition at the top. Combine ReadyStair sections with ReadyPlatform materials to get the configuration you want.

Easy to Assemble

Don't hire a welder or start planning trips to the hardware store. Bedford has made installing ReadyStair solutions a breeze. Materials easily bolt together using ordinary tools. The range of sizes makes it easy to order exactly what you need for most applications, and components can be easily trimmed to fit with standard tools if needed.

CUSTOM-ENGINEERED SOLUTIONS AVAILABLE

Safety Is Top Priority

You aren't sacrificing quality for speed. All ReadyStair components meet strict OSHA guidelines for worker safety, including safety yellow coloring, anti-slip surfaces and fire-retardant resins. Unlike metal, they're non-conductive and impact resistant, plus the low thermal conductivity reduces expansion and contraction to keep structures stable. You'll also get long-term reliability, because FRP holds up to corrosive environments and harsh weather.

Get exactly what you need – fast!

QUICK-SHIP OPTIONS

You don't need to wait for a custom build with ReadyStair stair towers.

- Fits in a 7' 6" x 12' nominal footprint
- 6' increments between landings, up to 30'
- Accommodates varying exit elevations in 9" increments to meet OSHA requirements

You can also combine ReadyStair sections with ReadyPlatform materials to get the configuration you want.
