Stairs In A Snap

READY FOR QUICK SHIPPING

OSCO Safety keeps ReadySeries fiberglass stair materials in stock for quick shipping to your installation site. Stair towers fit in a 7' 6" x 12' nominal footprint, rising in 6' increments between landings. When needed, a short stretch of up or down stairs is provided for the final transition at the top. Combine sections with ReadySeries platform materials to get the configuration you want.

EASY TO ASSEMBLE

Don't hire a welder or start planning trips to the hardware store. Installing ReadySeries fiberglass stair solutions is a breeze. Materials easily bolt together using ordinary tools. The range of sizes makes it easy to order exactly what you need for most applications, and components can be easily trimmed to fit with standard tools if needed.

SAFETY IS TOP PRIORITY

You aren't sacrificing quality for speed. All ReadySeries fiberglass-reinforced polymer (FRP) stair components meet strict OSHA guidelines for worker safety, including safety yellow coloring, anti-slip surfaces and fire-retardant resins. Unlike metal, they're non-conductive and impact resistant, plus the low thermal conductivity reduces expansion and contraction to keep structures stable. You'll also get long-term reliability, because FRP holds up to corrosive environments and harsh weather.

DECADES OF DURABILITY

Metal rusts and corrodes. Wood rots and warps. ReadySeries materials are built to maintain their structural integrity and appearance year after year in even the harshest conditions. The color is embedded throughout, so there's no worry about fading and no maintenance costs for repainting. The added protection of ReadyShield UV-resistant coating ensures performance for years to come.

BENEFITS OF FRP

- Resistant to heat, high winds, rain, snow, salt water and chemicals
- Won't shrink, swell, warp, corrode, dent, attract insects or conduct electricity
- Low maintenance for decades of continuous use
- Lightweight for easy transport and handling
- OSHA compliant

QUICK-SHIP OPTIONS

You don't need to wait for a custom build with ReadySeries fiberglass stair towers.

1

FITS A 7' 6" x 12'
NOMINAL FOOTPRINT

2

6' INCREMENTS
BETWEEN LANDINGS,
UP TO 30' FREESTANDING

3

ACCOMMODATES VARYING
EXIT ELEVATIONS IN
9" INCREMENTS*

*Meets OSHA requirements

BUILT TO LAST

To keep people safe, stairs and stair towers need to hold up against harsh environments and working conditions. ReadySeries prefabricated solutions are made of FRP, a lightweight yet incredibly strong material that won't rust, warp or corrode like metal and wood.

AVAILABLE EXCLUSIVELY THROUGH OSCO SAFETY

OSCO Safety is a recognized leader in top-quality industrial safety products and utility safety solutions, making OSCO a natural fit for ReadySeries sales and service. You'll have a single point of contact guiding you through your purchase. If needed, OSCO also offers engineering, design and drafting services. With ReadySeries, OSCO Safety is your one-stop shop for complete safety, access and maintenance systems.

APPLICATIONS

- Building products
- Cooling towers
- Distribution & warehousing
- Fertilizer & chemical operations
- Food & beverage facilities
- Industrial plants & facilities
- Material handling
- Oil & gas
- Pharmaceutical manufacturing
- Power generation & utilities
- Warehouse & distribution
- Water & wastewater
- Much more
